	DISPLACEMENT	3,498 cc	3,498 cc
DRIVETRAIN	TRANSMISSION	7-speed automatic	7-speed automatic
	DRIVE CONFIGURATION	2WD	AWD
TRACTION/STABILITY	ELECTRONIC STABILITY PROGRAM (ESP®)	ESP® compares the driver's intended course, via steering and braking inputs, to the vehicle's response, via lateral acceleration, rotation (yaw) and individual wheel speeds. ESP® then brakes individual front or rear wheels and/or reduces excess engine power as needed to help correct understeer (plowing) or oversteer (fishtailing). ESP® also integrates all-speed traction control, which senses drive-wheel slip under acceleration and individually brakes the slipping wheel or wheels, and/or reduces excess engine power, until control is regained. ³	
	4-WHEEL ELECTRONIC TRACTION SYSTEM (4-ETS) (4MATIC VEHICLES ONLY)	4-ETS monitors the speed of all four wheels to detect wheel slip, then applies individual brakes as needed (to provide the effect of locking the front, rear and/or center differentials) and/or reduces excess engine power. 4-ETS continually balances the torque split to help ensure that power is permitted to flow to the wheel or wheels with traction. ³	
PERFORMANCE	ACCELERATION (0-60 MPH) ⁴	6.5 sec. (est.)	6.5 sec. (est.)
	FUEL ECONOMY (CITY ⁵ /HIGHWAY ESTIMATE ⁶)	16 mpg/22 mpg	16 mpg/21 mpg

	STANDARD TIRES	235/50 R19 all-season	235/50 R19 all-season
BRAKES	BRAKING SYSTEM	Dual-circuit hydraulic braking system	
	ANTI-LOCK BRAKING SYSTEM (ABS)	ABS senses impending wheel lockup under heavy braking and pumps the front brakes individually or the rear brakes together (to help maintain stability) as needed up to 30 times per second, to prevent lockup and maintain steering ability.	
	BRAKE ASSIST (BAS)	BAS senses emergency braking via the speed at which the driver presses the brake pedal and immediately applies maximum available power boost, potentially reducing the overall stopping distance by eliminating the delay caused by a common human tendency not to brake hard enough, soon enough. Letting up on the brake pedal releases Brake Assist. ⁸

³ No system, regardless of how advanced, can overcome the laws of physics or correct careless driving. Please always wear your seat belt. Performance is limited by available traction, which snow, ice and other conditions can affect. Always drive carefully, consistent with conditions. Best performance in snow is obtained with winter tires. ⁴ Stated rates of acceleration are based upon manufacturer's track results and may vary depending upon model, environmental and road surface conditions, driving style, elevation and vehicle load. ⁵ 2009 EPA estimated fuel economy. Compare the estimated mpg to the estimated mpg of other vehicles. You may get different mileage depending on how fast you drive, weather conditions and trip length. ⁶ Your actual highway mileage will probably be less than the highway estimate. ⁷ With trailer hitch kit and trailer brakes. Please read Operator's Manual before towing. ⁸ Braking effectiveness also depends on proper brake system maintenance, and tire and road conditions. ⁹ Width with mirrors folded out. ¹⁰ Unsecured cargo can become hazardous in a collision. Always secure cargo using the floor-mounted tie-downs.
